## Case Study

Right Digital Solutions

### Pakeman School

Pakeman School, in Islington, had a managed print infrastructure that wasn't fit for purpose. Their previous supplier wasn't providing the support and service their printer fleet needed. RDS were happy to help!

#### What they got:

- 📌 **Cost reduction:** The solution reduced Pakeman School's costs by 13%, allowing funds to be redirected to other areas.
- 📌 **Efficiency:** Our solution created intangible savings by making Pakeman more efficient in their day-to-day operations
- 📌 **Seamless deployment:** User-friendly installation minimised disruption throughout the process.

#### What we did:

RDS installed a mixed fleet from two manufacturers. These MFP machines are known for low running costs and reliability. We also installed cutting-edge print management software to provide Pakeman with full transparency over their print output and spend.

Working with RDS has been a very smooth and supportive process. Communication is excellent and continuous. As a school, we are very happy with the service.
