

Microsoft 365 + Azure users

Optimise your IT investments with Right Digital Solutions' Tech Check+, powered by Quantum.

# Skyrocketing subscription costs + lack of visibility holding your business back?

Licence management

Cost control

Centralised visibility

The challenge

# Managing your Microsoft 365 + Azure infrastructure

Microsoft 365 Suite and Azure are essential tools for many businesses. In today's digital world of working, the collaborative features of Microsoft 365 and the powerful data processing and virtual servers provided by Azure are commonplace.

While 365 and Azure have the power to optimise your business, their scale and complexity can lead to challenges. Without proper visibility, your IT infrastructure can quickly spiral out of control. This results in inefficient operations, higher costs and compliance risks, ultimately affecting your organisation's overall performance and security.

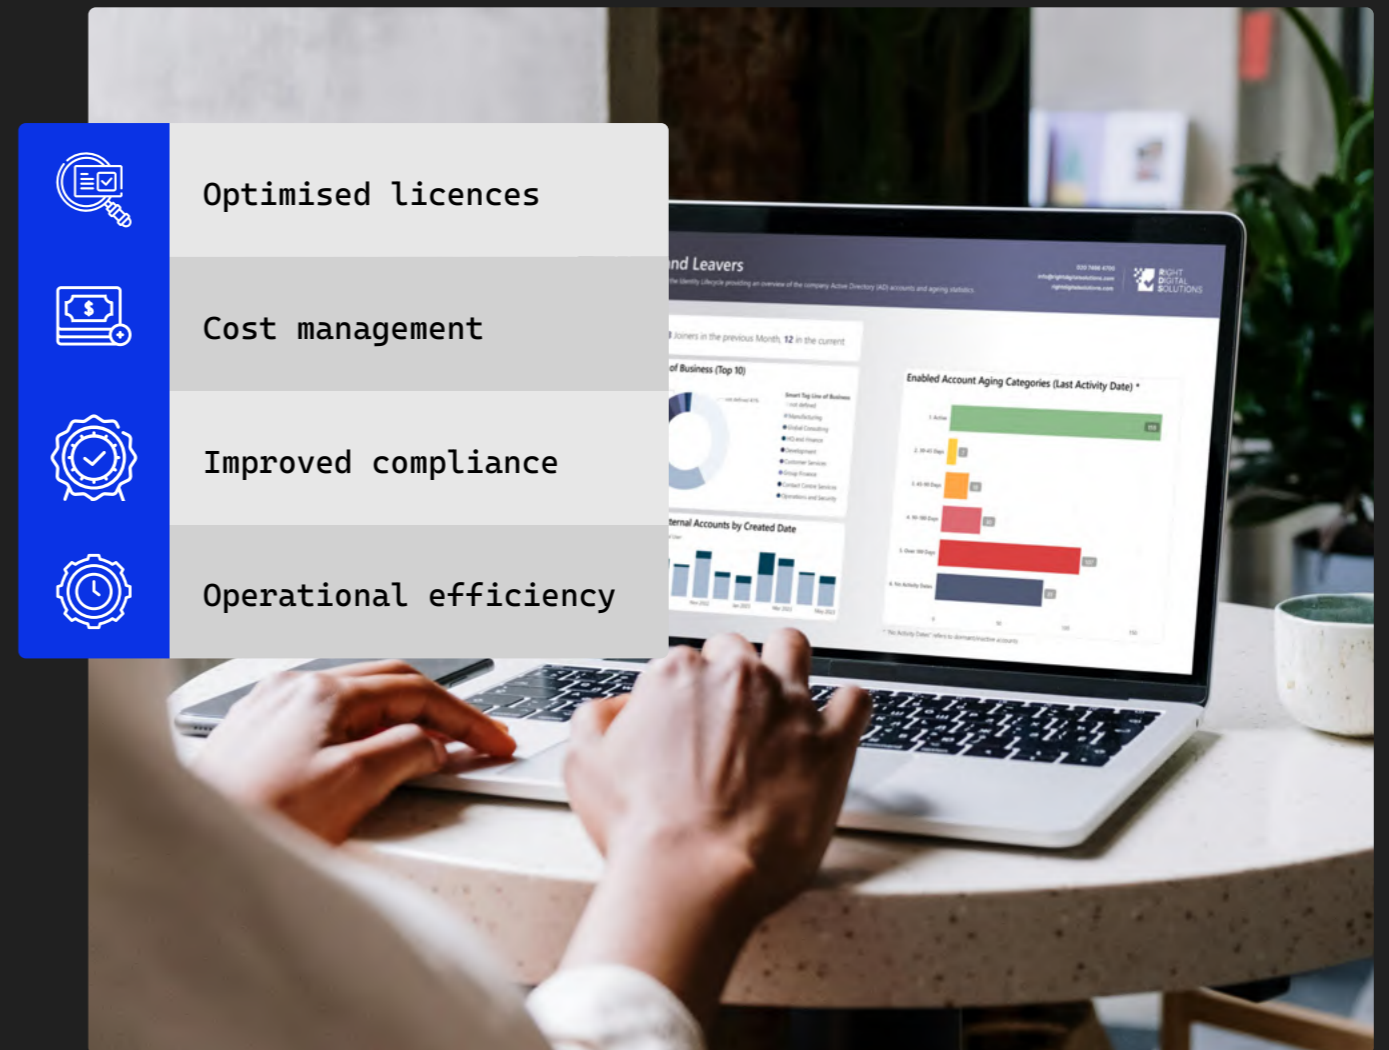

Device visibility issues	Confusing licences cost	Tracking licences
Managing employee transitions	Microsoft 365 + Azure <b>Common management challenges</b>	Compliance risks
Poor usage monitoring		Limited user insights
Workspace management	Planning budgets	Mismanaging premium licences

The solution

# Reboot your IT strategy with RDS Tech Check+

Designed for IT leaders by IT leaders, RDS' Tech Check+ centralised dashboard provides comprehensive visibility and control over your Microsoft 365 and Azure environments. From optimising licences to managing cloud costs and compliance, we help you take control, spend less and plan better.

- Optimised licences
- Cost management
- Improved compliance
- Operational efficiency

Take control | Spend less | Plan better

# Why RDS Tech Check<sup>+</sup>

## Microsoft 365

With our 365 Tech Check<sup>+</sup>, leave the management of your licences to us while we provide you with valuable insights, enabling you to make decisions backed by live data.

Feature	Benefit
<b>Visibility across your estate:</b> Gain a clear view of all your devices and their usage.	<b>View user activity:</b> Understand how your team is using Microsoft 365.
<b>Process for joiners, movers &amp; leavers:</b> Efficiently manage employee transitions.	<b>Eliminate wasted licences:</b> Cut costs and optimise your investments.
<b>Current licence agreements:</b> Understand your licence costs and additional products.	<b>Improve financial planning:</b> Better budgeting and spending forecasting.
<b>Three-year licence overview:</b> Track the licences you've bought & used over the past three years.	<b>Improve ROI:</b> Identify and eliminate licences with little or no usage.
<b>Ongoing usage analysis:</b> Monitor how your licences are being utilised.	<b>Clarity for renewals:</b> Right-size your current and future licence renewals.
<b>Spend forecasts:</b> Predictive analytics to estimate future spend and resource allocation.	<b>Cost saving:</b> Plan your budget and identify areas to save money.
<b>Premium licence allocations and usage:</b> Manage and optimise premium licences.	<b>Negotiate licence renewals with confidence:</b> Approach licence renewals with the right data.
<b>Detailed Office 365 apps &amp; user activity information:</b> Get in-depth insights into app usage and user behaviour.	<b>In-depth understanding of your Microsoft 365 estate:</b> Leverage advanced insights for better decision-making.
