Helping Mettis **achieve** sky high **optimisation**

The challenge

Mettis Aerospace has firmly established itself as a high-flyer in the world of aerospace manufacturing. As they say: there isn't a plane you can fly on that doesn't have parts from Mettis.

They reached out to RDS because they needed a top-flight IT and print infrastructure that would provide:

Print Efficiency: Moving to a streamlined, high-performance print fleet.

Stronger Security: Ensuring sensitive documents remained protected.

Sustainability Goals: Reducing paper and ink use & contributing to global reforestation.

Scalable Growth: A cost-effective approach to print and IT management.

> "
> Partnering with Right Digital Solutions has significantly improved our IT and print management processes. Their innovative solutions addressed our specific challenges, leading to considerable cost savings, enhanced security and progress towards our sustainability goals. RDS have been invaluable to our operations.

The solution

Right Digital Solutions stepped in with a comprehensive Managed Print Service (MPS) tailored to address Mettis' specific pain points:

Rationalising printing fleet:

RDS replaced all inkjet desktop devices with high-speed network MFDs, managed through an automated toner replenishment system, reducing waste and costs.

Enhanced security with PaperCut MF:

Implementing PaperCut MF allowed Mettis to control and secure print jobs, ensuring documents are only released to authorised users using their door access fobs.
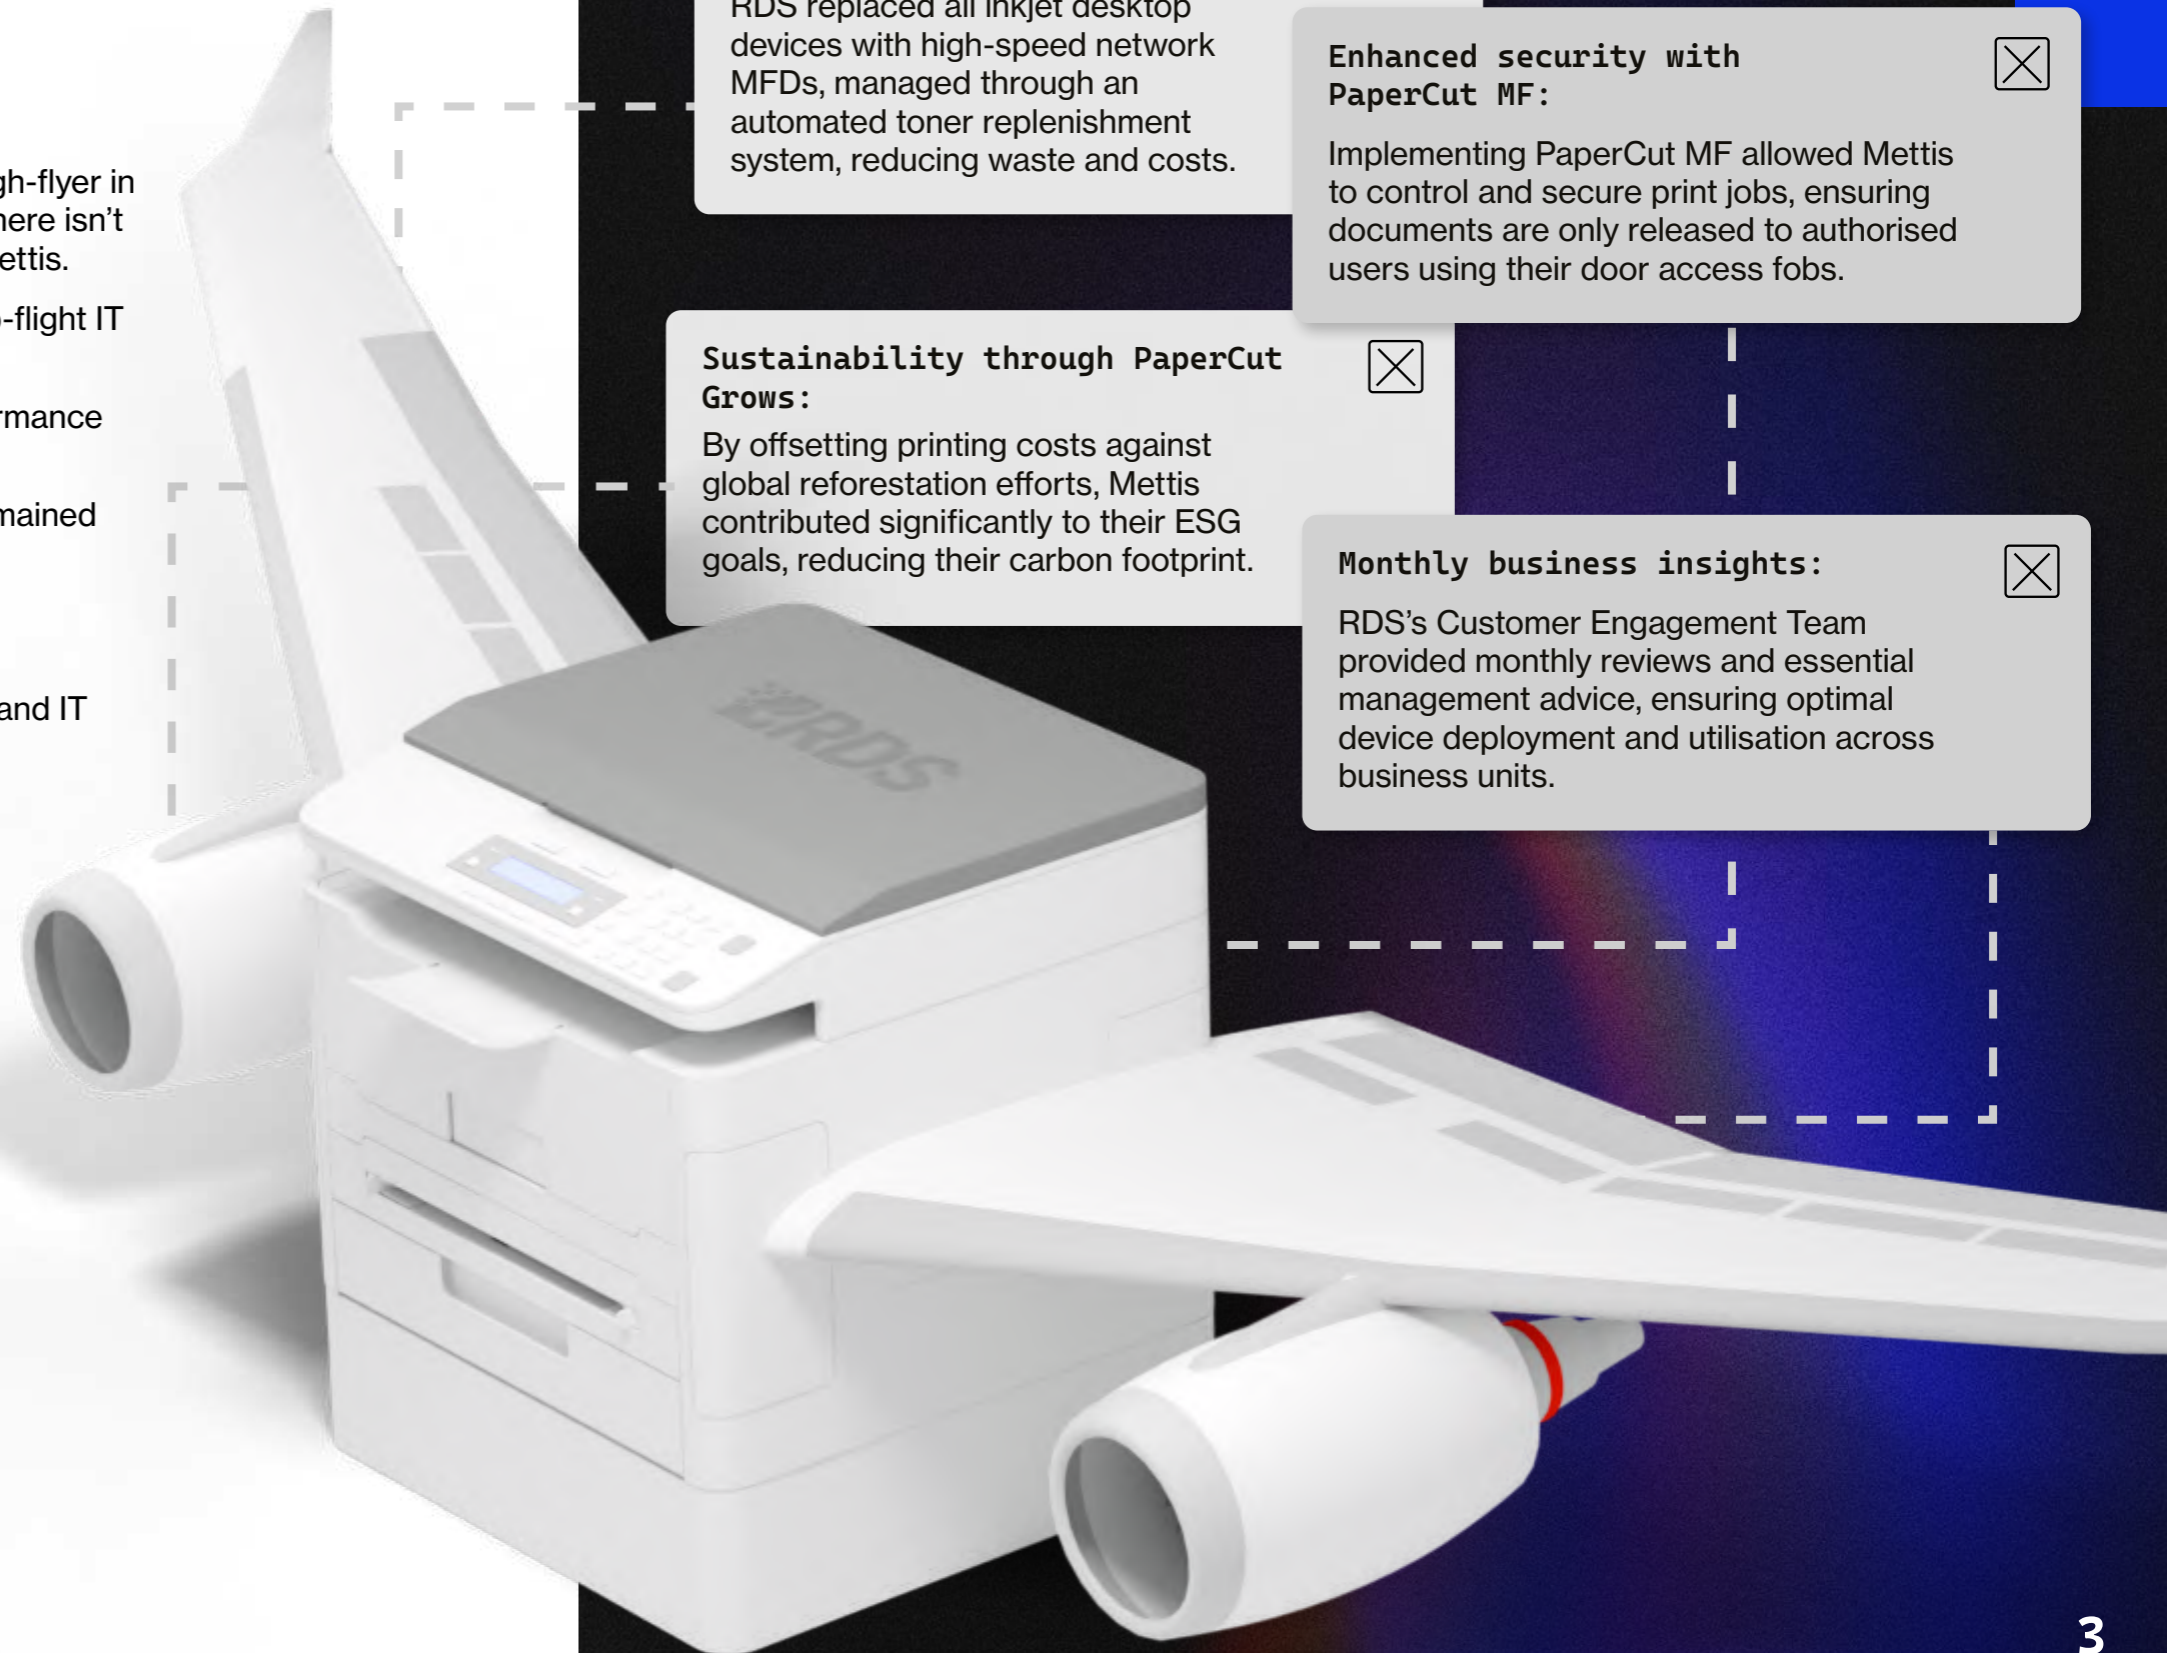

Sustainability through PaperCut Grows:

By offsetting printing costs against global reforestation efforts, Mettis contributed significantly to their ESG goals, reducing their carbon footprint.

Monthly business insights:

RDS's Customer Engagement Team provided monthly reviews and essential management advice, ensuring optimal device deployment and utilisation across business units.

Lift off to cost savings, compliance, sustainability and security.

Through the partnership with RDS, Mettis Aerospace achieved remarkable outcomes:

Substantial cost reduction
Significant savings in print-related expenses.

Significant waste reduction
Streamlined processes led to substantial waste reduction.

Enhanced security:
Improved security protocols ensured that sensitive information remained protected.

Sustainability goals:
Exceeded ESG goals through print and paper reduction and global reforestation efforts.
