

# Copilot

Your everyday AI companion

Today

## How can AI help my business work smarter?

**Microsoft Copilot** automates tasks, generates insights and streamlines workflows - **right inside Microsoft 365.**

**Brought to you by RDS**  
your AI integration partner

# Work is changing - has your technology kept up?

ERROR!

Teams are busy juggling ...  
Disconnected systems, manual workflows and information overload...

Documents

Meetings

Customers

Data

Emails

Reports

ERROR!

- ✗ Slower decision-making
- ✗ Reduced efficiency
- ✗ Missed opportunities

This means ...

# 58%

of employees spend their time managing work rather than doing it.

WITHOUT COPILOT

The daily frustrations teams face... but never have time to fix.

"Meetings should bring clarity, not just more emails."

"I spend half my day drowning in emails and admin."

"How do I get more done without burning out?"

"We have so much data, but finding it takes forever."

"I barely have time for actual work."

WITH COPILOT

How to end frustrations and regain time with the power of AI.

16:52

Today

**Automates admin** - frees up time by handling emails, scheduling and routine work.

**Gives focus back** - reduces distractions, so teams can work on what truly matters.

**Finds data instantly** - surfaces insights in seconds, eliminating endless searching.

**Summarises communication** - turns meetings and email threads into clear, concise actions.

**Prevents overload & mistakes** - reduces errors and helps teams work smarter.

# How different departments use Copilot to work smarter

Copilot transforms the way teams work across every department:

Microsoft research found that AI can help employees complete tasks

29% faster

## Marketing Teams

Generates content ideas, refines messaging and automates reporting.

## Sales Teams

Drafts personalised emails, creates proposals and forecasts sales trends.

## Executives & Leadership

AI-powered insights and data summaries for faster decision-making.

## HR & Operations

Creates job descriptions, streamlines onboarding and summarises policy documents.

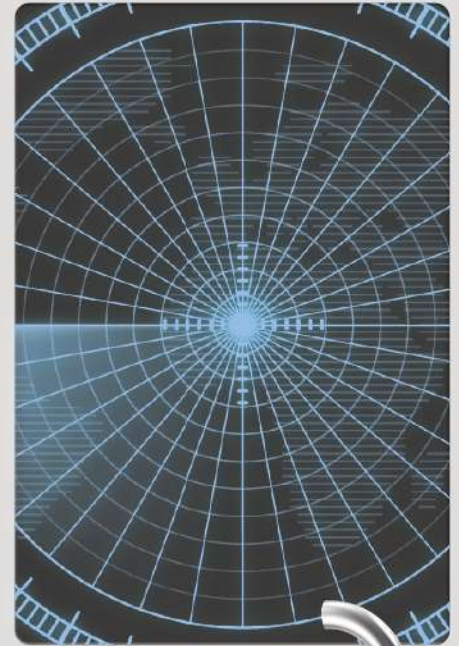

## Enterprise-grade security, built into Copilot

Data stays within your Microsoft 365 environment - unlike public AI tools.

Respects existing permissions & security policies - users only see data they're authorised to access.

Microsoft compliance standards: GDPR, ISO 27001, SOC 2 and more.

## How we can help you implement Copilot?

Copilot readiness assessments – is your business AI-ready? We help you prepare.

Deployment & configuration – seamlessly integrate Copilot into Microsoft 365 while ensuring security, compliance and governance are in place.

Interconnected IT support – we can help optimise your wider digital infrastructure, ensuring Copilot works alongside your existing tools, workflows and security framework.
